Glossary and clarification of report contents

This report includes only cases with RBF services where Milestone 1 was authorized on or after 07-01-06 and the case was active or closed during the report period. Cases closed prior to the report period are not included.

Active VR case = a client case that has not yet been closed, either successfully or unsuccessfully.

Authorized service = a service that VR has authorized the provider to deliver on a printed "authorization form" that lists the employment services, prices, and date ranges.

Clients are still looking for jobs = active VR cases with clients who are currently working with this provider to obtain employment.

Clients did not get a job or keep the job = unsuccessfully closed cases.

Clients got jobs = client cases who achieved Results Based Funding (RBF) Milestone 4. Depending upon the timing of the report submission, it is possible for a client to have achieved Milestone 4 without yet having their case successfully closed by VR.

Clients switched providers = clients who started employment services with this provider but later stopped services and started with a different employment service provider. This can occur for a variety of reasons; the cause is not analyzed in this report.

Clients voluntarily left the program = clients who decided on a different path to achieve their employment goal, and switched from an employment service program to a different plan of service.

Developmental disability = includes clients with disabilities of mental retardation or autism.

Employment services = employment services include: development of job-seeking skills, job placement, on-the-job training and supported employment. The VR Counselor and/or this provider can provide more information regarding these services.

Integrated setting = a job setting that typically also includes non-disabled workers.

Interrupted services = an interruption of all client services which delays progress during the life of a case due to circumstances outside of the control of the VR Counselor or the provider (e.g., client hospitalization), sometimes referred to as "status 24".

Interrupted services can also relate to a temporary interruption of only employment services, sometimes referred to via case note "Employment Services Temporarily On Hold". If a case has interrupted services, the timing statistics are not included as they could unfairly skew the provider's average number of days to develop a plan or get a job. Dropping these cases from the two timing statistics could cause a mismatch of the 'clients got a job and kept the job' count and the total client counts of the timing statistics.

Median = the middle number in a series of numbers, sometimes thought of as the halfway point. When there are an odd number of digits in the series, the median is the middle number (e.g., for series 1,5,8,9,10 the median is 8). When there are an even number of digits in the series, the median is the average of the two middle numbers (e.g., for series 1,6,8,9 the median is 7).

Mental illness = includes clients who have schizophrenia, or suffer from depression, anxiety disorders, etc.

Milestone 1 = the plan for employment and supports.

Milestone 4 = indicates that employment was maintained for 60 to 90 days and the case is eligible for VR successful case closure.

Other disabilities = includes clients who are not included in the other categories, such as clients who have learning disabilities.

Period = the specified date range at the top of the report. The default is one year (365 days) prior to the report creation date.

Physical Disabilities = includes clients who have paralysis, amputations, or other physical disabilities.

Placement = starting a job in an integrated job setting.

Plan for employment = Plan for Employment and Supports (PES), developed by client, provider, VR Counselor, and the client's support team, which serves as a roadmap to achieve the client's employment goals.

Provider = the company providing the employment services.

Results Based Funding (RBF) = provider payment methodology that is based on a client's progress toward the employment goal.

Sensory disability = includes clients who are blind or have visual impairments and/or who are deaf or hard of hearing.

Successfully closed VR case = a client case where an employment outcome was achieved in an integrated setting at or above federal minimum wage and the employment was maintained for 60 to 90 days, sometimes referred to as "status 26 closures".

Total VR clients served by this provider = a breakdown of the clients who had employment services authorized to this provider.

Traumatic Brain Injury (TBI) = damage to the brain resulting in impairment(s).

Unsuccessfully closed case = indicates that the case was closed but an employment outcome with the necessary wage and employment duration was not achieved. This could include "status 08", "status 30", or "status 28" closures. Unsuccessful case closure can occur for a variety of reasons; the cause is not analyzed in this report.

What disabilities were served = a breakdown of the primary disabilities of clients who received RBF services from this provider.
